Business Technologies, Inc. Marks 15th Anniversary

SUFFOLK, VA., April 26, 2004 – Business Technologies, Inc. marked its 15th year in business on April 12, 2004. The company offers storage and retrieval systems for healthcare, education, business and government applications. Custom color coded filing systems, micrographics, ergonomic work stations, paper handling equipment and consulting services are also available through Business Technologies, Inc.

“We started without any customers, and under 200 feet of office space,” said Dale Edge, president. “Now we have approximately 1,000 customers and over 14,000 square feet of office and warehouse space. We represent various manufacturers so that we can offer our customers a full range of products to help them make the best use of storage space for files, supplies and equipment. We also represent several furniture manufacturers so that we can help businesses provide conducive work environments for their employees.”

“The City of Suffolk congratulates Business Technologies, Inc. on their 15th Anniversary” said Suffolk Mayor E. Dana Dickens, III. “We wish them continued success and look forward to a long-lasting business relationship.”

Business Technologies, Inc. offers complimentary, on-site space analysis in order to recommend products and services. “We worked closely with the architects who designed the new Obici Hospital in Suffolk to ensure that various departments including materials management, medical records and radiation therapy would have the storage and filing space they needed,” said Julie Edge, vice president.

Business Technologies, Inc. has received performance awards from Spacesaver Corporation, the leading manufacturer of high density mobile storage systems in North America. “BTI has done a great job representing Spacesaver products in the Hampton Roads, Virginia area since 1996, and we look forward to many more successful years to come,” noted Paul Olsen, president of Spacesaver Corporation. “Their professionalism, enthusiasm and ethical standards are evident in all they do. I wish them continued success as they continue to grow their business.”

“Our customers have made us successful for the past 15 years, and we appreciate each and every one of them,” said Dale Edge. “We look forward to providing them quality service for at least another 15 years.”

In addition to completing projects here in the Hampton Roads region, Business Technologies, Inc. has contracted work in North Carolina, Florida and Hawaii.

The full service records management and space management company relocated to Suffolk from Chesapeake in July of 2002. The move allowed them to continue servicing customers throughout Hampton Roads and to gain some much needed office and warehouse space. The Suffolk Economic Development Department assisted Business Technologies, Inc. in their site selection decision.
